PERSONAL INFORMATION

Web developer specialized in React.js, with almost 3 years of experience with multiple languages and frameworks such as React.js, Laravel, Node.js and Express.js. I have experience working in a team, following the Agile SCRUM methodology and using Git and GitLab for version control. I am passionate about this industry and therefore I seek to learn new working techniques, that allow me to grow in this field, learning day by day and improving my skills.

WORK EXPERIENCE

Web developer

Byron Group| April 2021 - July 2021

- Web application development using React.js and Redux

React.js developer

Digio Soluciones | February 2022- May 2022

- Web application development using Meteor.js and React.js
